Hi Nancy, For question #3:

(b) (5)

I ran a raw data max value report in AQS for CDF. (b) (5)

(b) (5)

Also, here are my comments to the draft letter - please let me know if you'd like any further clarification or word sleuthing.

Thanks, Dena. Also, I am attaching a draft letter that slightly edits the paragraph you provided me on the annual monitoring network assessments – can you take a look? Thanks!

Subject: 3 Questions

Hello Matt and Nancy,

I am just following up on three questions I have been waiting for a response on. I spoke with Nancy about 10 days ago, and she indicated these might be discussed at a meeting last Wednesday.

1. Will the EPA call, or send an email to Larry Allen of SLOPACD, supporting the request from CCCA for an additional monitor in the most impacted neighborhood. This is necessary

to assess whether the mitigation (hay bales and wind fences) being placed closer to the CDF monitor, are having an impact on the monitor readings. Citizens want to know what their actual exposure levels are.

2. CCCA founders and members have seen no significant improvement in air quality or mitigation efforts since our letter to the EPA in 2013. We feel it is time to request the south county be designated in non-attainment for PM 10 and 2.5. Before doing so, I asked Nancy what other action the EPA might take to encourage the APCD, CARB and State Parks OHV Division to act. Nancy did not have any other options to offer. Are there any?

3. Given that the PM 10 levels in the riding area are between 1,000 mcg and 4,000 mcg per cubic liter, far above State or Federal standards and at levels that could be injurious to health. Will the EPA recommend a public warning be given by the Park management to visitors?

Thank you for your assistance.
